

ESRAA ALI

Full-Stack Developer | WordPress

01012847580 • esraahamaza299@gmail.com • LinkedIn • Egypt

Summary

Full-Stack Developer and **WordPress Specialist** with extensive experience building scalable, high-performance web applications using the **MERN stack** (MongoDB, Express, React, Node.js). I excel at architecting secure **RESTful APIs**, optimizing front-end performance, and implementing complex **CMS solutions**. Committed to writing clean, modular code and leveraging data-driven technologies to solve complex business challenges.

Experience

Digilians (MCIT Initiative)

Egypt

Fullstack Developer Intern

01/2026

Company Description

- Engineered responsive web applications using React.js and Node.js, achieving 100% cross-browser compatibility and mobile optimization.
- Architected RESTful APIs with Express.js to streamline data flow between frontend interfaces and MongoDB/PostgreSQL databases.
- Leveraged Redux and Context API for global state management, eliminating prop-drilling and enhancing performance in complex component trees.
- Boosted application security and dynamic functionality through seamless integration of third-party APIs and JWT/Firebase authentication.
- Accelerated initial page load speeds by implementing advanced lazy loading and code-splitting techniques in React.

Information Technology Institute (ITI)

Egypt

Software Engineer Intern

01/2025

An institute providing training in information technology and software development

- SEO & CMS: Optimizing WordPress architectures and implementing on-page SEO to drive user retention

Projects

WordPress CMS Travel Platform

Egypt
01/2025

A full-featured WordPress CMS Travel Platform that allows users to book and manage travel experiences

- Interactive search and booking: Integrated advanced filtering for destinations and price ranges alongside a secure, direct online booking engine.
- Payment and localization: Deployed global payment gateways (Stripe/PayPal) and multi-currency support for an international user base.
- Advanced SEO and trust: Implemented Travel Schema SEO for Rich Snippets and social proof widgets to maximize search visibility and user trust.
- Geolocation and UX: Integrated Google Maps API for interactive tour pinpointing and improved a mobile-first design for on-the-go accessibility.
